Summary:

NTU and Sichuan University have teamed up to train the local masons and equip them with cost-effective techniques developed by NTU LIFE to strengthen buildings.

NTU revealed that the strengthened and retrofitted buildings will not collapsed even an earthquake with a magnitude of 8.0 Ms hit the region.

Under this project, a team of 10 faculty and graduate students from the College of Architecture and Environment at Sichuan University was selected to be master trainers. They, in turn, transferred their knowledge by teaching the construction techniques to more than 40 local masons.
