News Summary:

The Agency for Science, Technology and Research (A*STAR)'s Institute of Chemical and Engineering Sciences (ICES), German Academic Exchange Service (DAAD), Unifying Concepts in Catalysis (UniCat) and Nanyang Technological University (NTU) are pleased to present a first of its kind joint symposium dedicated to the advancement of catalysis on 2 November 2009 at Biopolis, Singapore.

The programme will include lectures by invited speakers from ICES, NTU, Technical University Berlin, Humboldt University Berlin, Fritz-Haber-Institut der Max Planck Gesellschaft and BASF. The speakers will cover the technological advances and discoveries in catalysis in catalytic applications of advanced materials, electro-catalysis, fuels and energy storage.
