

Annex B

Government agencies supporting NTU's REIDS initiative:

1. Economic Development Board - Lead government agency for planning and executing strategies to enhance Singapore's positing as a global business centre
2. National Environment Agency - Lead government agency responsible for improving and sustaining a clean and green environment in Singapore

Leading multinational companies involved in NTU's REIDS initiative:

1. Accenture – one of the world's leading organizations providing management consulting, technology and outsourcing services
2. Adaro Power – one of Indonesia's largest energy group
3. Class NK – not-for-profit society dedicated in providing classification and technical services to maritime and clean tech industries
4. DLRE – Singaporean company focusing on microgrids, distributed generation, remote area power systems
5. EDF – one of world's largest electricity producer with activities in electricity generation, distribution, natural gas, nuclear and renewable energy
6. Emerson – a world leader in a wide range of energy technologies and services
7. ENGIE – one of world's largest independent electricity producer with activities in electricity generation and distribution, natural gas and renewable energy
8. Envirotek – clean technology investment company based in Singapore focusing on marine/ocean renewable energy
9. Evolution Energie – leading energy management software developer
10. General Electric Grid Solutions - industry leader in electric power generation, electric grid equipment, and transport solutions
11. IDSUD Energie – top smart energy company and manufacturer of integrated wind-solar energy for lighting solutions
12. Keppel Fels – global leader in offshore rig design, construction and repair, ship repair and conversion, and specialized shipbuilding
13. Medco Power – one of Indonesia's largest private electricity producer with activities in power plant construction, operation and electricity generation
14. Murata – leading corporation in the field of large-scale energy storage systems for power grids
15. Nortis – renewable power project developer based in Thailand, specializing in solar development
16. Renewable Energy Corporation (REC) – top company that operates the world's largest integrated solar manufacturing complex outside of China in Singapore
17. Rolls-Royce – a world leader in engine manufacturing business
18. Schneider Electric – global company specialising in electricity distribution, automation, and energy management
19. Sembcorp – leading energy, water and marine group operating across five continents worldwide.

20. Trina Solar – pioneer of China's photovoltaic industry and global solar modules, and solutions provider
21. VDE – leading quality assurance company for the renewable energy sector involving certification activities
22. Vestas – a world leader in manufacturing and installation of wind turbines

Non-government organisation supporting the REIDS initiative:

1. Sustainable Energy Association of Singapore (SEAS) - SEAS represent the interests and provide a common platform for companies in renewable and clean energy to collaborate and undertake viable projects together
