THE WHAT? L'Oréal Singapore has joined forces with Nanyang Technological College (NTU Singapore) to open a brand new joint laboratory to conduct analysis on the neighborhood of micro organism, fungi, and viruses (**additionally** referred to as the microbiome) that dwell on our pores and skin and scalp.

THE DETAILS Hosted by the Singapore Centre for Environmental Life Sciences Engineering (SCEI) number one biofilm and microbiome Analysis Centre of Excellence, the partnership will see round researchers from SCELSE and L'Oréal work collectively within the joint laboratory.

The lab, situated on the NTU Good Campus, can be headed up by NTU Affiliate Professor Scott Ric Deputy Director of the Biofilm Biology cluster at SCELSE, and Dr. Tarun Chopra, Director, Superior Analysis, L'Oréal Singapore.

The collaboration evolves a standing relationship between L'Oréal Singapore and SCELSE, with the companions having already patented new applied sciences.

THE WHY? Working collectively, researchers will look into 'attainable purposes of microbes for cosmetics and dermatology.'

Dr. Mark Phong, Asia Director for L'Oréal's Superior Analysis Labs, mentioned: "We're wanting ahead working with SCELSE to additional discover the realm of pores and skin and scalp microbiomes, to gasoline future improvements for our shoppers."
