

NTU to host new AI robotics lab with Germany motion tech firm

Nanyang Technological University (NTU) Singapore and [Schaeffler](https://www.techinasia.com/news/schaeffler) have launched a new phase in their partnership to develop AI-enabled humanoid robotics at a new 900-square-meter corporate laboratory on NTU's campus.

The lab will focus on collaborative robotics, autonomous mobile robot platforms, and assistive robotic systems for manufacturing, logistics, and healthcare.

It is supported by Singapore's National Research Foundation under the Research, Innovation, and Enterprise 2025 plan and involves the Economic Development Board.
