NTU GLOBAL IMMERSION PROGRAMME

The Global Immersion Programme is an initiative by the Nanyang Technological University to provide students with a thorough experience of studying and/or working in a global environment. Participating students will have the opportunity to study and/or work in China or the United States of America for up to six months or both.

NTU has worked closely with its overseas partners to tailor programmes so that the students can fully benefit from the GIP. Students who opt for China will be able to work in companies in Zhangjiang Hi Tech Park in Shanghai, the Beijing Economic and Technological Development Zone, Zhongguancun Science Park in Beijing, among others. These companies include Hi-P International Limited, PMG China and Singapore Computer Systems. They will also have the opportunity to take special elective courses such as Chinese culture, contemporary history or language in top Chinese universities such as Peking University, Tsinghua University or Shanghai Jiaotong University.

Students who travel to the US will study either in the University of Washington, Seattle or the Georgia Institute of Technology in Atlanta.

NTU also offers assistance in finding accommodation and subject matching so that students can enjoy a thorough experience studying and/or working in a global environment.

For more information on the GIP, visit http://www.ntu.edu.sg/gip
