About Lien Ying Chow Legacy Fellowship 连瀛洲纪念奖学金

Programme Structure

The Lien Ying Chow Legacy Fellowship is centred around an exchange programme which involves a research project (e.g. government, corporate or not-for-profit initiative) in a specified area of interest.

The programme is highly flexible and is customised with regard to topic, design and duration to suit each individual. Fellows will identify, propose and develop their research topic and are encouraged to actively participate in the design of their programme – normally a good mix of networking, mentoring, seminars and coursework – together with their mentor.

Lasting approximately three months, the programme can be spread out over the course of a year to fit in with each Fellow’s objectives and availability. The research will primarily be conducted in Singapore and China. If appropriate, it can be extended to other countries.

To kick off the programme each year, Fellows will attend a common induction course in the following:

- Developmental Economics
- Technology and Sustainable Development
- Entrepreneurship, Innovation and Enterprise
- Social and Cultural Aspects of Sustainable Development

A key component of the Fellowship is the opportunity to meet current and past Fellows. Each programme will begin and end with a gathering of Fellows to facilitate cross-fertilisation of ideas and lay the foundation for life-long, cross-border bonding.

The language of instruction is either Chinese or English.
