Recollections and Reflections from Top 2005 Graduates

Wu Jie

“.... I have benefited enormously from the diversity of the curriculum offered by this degree course. .... Other than the technical know how, it has given me the unique chance of learning entrepreneurial spirit .... and the proper use of psychological methods to enhance one’s confidence in dealing with people.”

“.... during my industrial attachment I was deeply impressed by the Fiber-To-The-Home (FTTH) project, a future information society .... such exciting prospects of the photonics industry and its potential impact on the society shaped my career vision ....”

“.... I believe that I can contribute to the construction of a refulgent optical society and will eventually witness the advent of the brilliant optical era.”

Lian Sze Wei

“.... I have gained the ability to integrate my technical and business competencies to come up with creative and innovative solutions. This is especially relevant in my current role as an application engineer in a leading foreign bank .......”

“.... I have also learnt to interact and build relationships with other NTU students from all over the world. This has helped me greatly at my current workplace where I have to work and interact with colleagues of different nationalities and cultural backgrounds .......”
