First Words

This issue of the E3 World coincides with the graduation of the Class of 2003. My heartfelt congratulations to all EEE graduates on your convocation. You truly deserve to be applauded upon the completion of this challenging yet enriching journey.

As you begin the next lap of your journey, I trust that the experience you have had with us will stand you in good stead to face the many challenges ahead. There will be successes and there will be hard times, but perseverance, hope, and a lot of hard work will see you through.

The talent of success is nothing more than doing what you can do well, and doing well whatever you do.

My colleagues and I wish you every success in all your future endeavours and we hope that you will continue your close ties with us after your graduation.

Professor ER² Meng Hwa
Dean
School of Electrical & Electronic Engineering

The School Logo

The School logo consists of the 3 letters “EEE” arranged to form a cube, in short, E cube (E³). The 3Es represent the 3 main activities which the School aims to achieve in the mission statement, i.e. excellence in teaching, excellence in research and excellence in professional services to industry. The 3Es are also designed in an interlocking pattern to form a hexagon. This signifies that the 3 main activities are closely interrelated and aptly separated by very thin lines. Its deep blue colour emphasises the synergy of passion, perseverance and dedication in the lifelong journey of exploration, learning and discovering in our quest for new knowledge and contributions towards a better future society. The simple and yet elegant design symbolises the commitment of the School to achieve the ultimate goal of E³: Excellence in Engineering Education.
