L.I.F.E. @ NTU

NTU organized its annual open day for the public on 11 March 2006. It was the day the university opened up its renowned garden campus to visitors for a day filled with festivities and excitement. Targeted at JC and polytechnics students, Learning is Fun and Exciting @ NTU, or fondly called L.I.F.E. @ NTU, had proven to be very successful – judging from the 12,000 visitors who came.

As usual, School of EEE, in collaboration with EEE Club, did not miss out on the excitement and work in promoting NTU in general, and the School of EEE in particular, to the students. There was not any moment for the professors and student helpers to relax as the swarms of visitors kept congregating at the School of EEE’s booth in the SBS building. Being one of the oldest and largest schools in NTU, School of EEE certainly has the pull to attract potential students to study in EEE. This was evident judging from the visitors’ enthusiastic response towards the School of EEE even though the highlight of the day was the draw for the L.I.F.E. @ NTU 2006 trivia where visitors stood the chance to win prizes including air-tickets sponsored by STA, MP3 players, colour printers and more.

Besides, visitors to the DSP laboratory got to see latest works that had been published in the newspaper recently.

The visitors got more than what they had bargained for when Discover Engineering @ NTU was held concurrently in Nanyang Auditorium. Numerous URECA, FYP and Research Projects intrigued the students. As usual, products of School’s undergraduate never failed to fascinate the students.

The programme for L.I.F.E. @ NTU involved more than just talks. Visitors were treated to laboratory tours as well. Conducted at one hour intervals each, the tours had been marvelous. The visitors got to see the latest innovation in gyroscope with a twist as a professor tried to stand on a two-wheel gyroscoped vehicle.

It was a day full of excitement. With all the work done in promoting our school, it is quite certain that we will continue to be one of the largest schools in NTU with the brainiest students and professors alike. It was a day where the Nanyang spirit was truly in the air.
