Global Immersion Programme

A new Global Immersion Programme (GIP) is being initiated as an important component of the New Undergraduate Experience at NTU. This programme is aimed at providing NTU students with the opportunity of having a thorough experience studying or working abroad for a significant period of time. NTU undergraduate students will receive their core academic training in Singapore, followed by one semester overseas, either in a prestigious U.S. university to undertake a number of subjects, and/or in an attachment in an organization in China. Over time, other countries in Europe and India could be included. The objective of the GIP is to help NTU undergraduate students gain a broader and more global perspective on issues as well as to provide them with opportunities to build an international network.

The GIP will provide NTU students with the following benefits:
1. A thorough experience in the world's largest (USA) and fastest growing economies (China and India) - the culture, system, ideals, entrepreneurialism, innovativeness, creativity and energy.
2. A competitive edge - street smart, cultural intelligence and a broadened point of view.
4. An invaluable network - to start a new business or land a position overseas.

Visitors To EEE (continued from pg 30)

Name              Title                  Institution                                      Country     Period
