Supported by the Infocomm Development Authority of Singapore (IDA), Nanyang Technological University (NTU) and Georgia Institute of Technology (Georgia Tech) have collaborated on a new integrated Bachelor of Engineering (Computer Science) and Master of Science (Computer Science) programme. Students enrolled in this programme will graduate with both degrees, which can be achieved within four years.

**NTU-Georgia Tech Integrated BEng & MS Programme in Computer Science**

This fast-track programme is tailor-made for students awarded the IDA’s National Infocomm Scholarships. Scholars will spend three years in NTU’s School of Computer Engineering, where a strong foundation in computing will be built. There will also be opportunities to select from a myriad of undergraduate-level subjects including computer game programming, intelligent systems, and network security.

Students will spend the next one to one-and-a-half years at Georgia Tech’s College of Computing, reading graduate-level subjects and going into an in-depth study of their chosen specialisations. The diversity and flexibility of the curriculum allows students to have a comprehensive all-rounded education, with a global perspective.

**National Infocomm Scholarship**

The National Infocomm Scholarship offered by IDA aims to build a pool of infocomm professionals taking leadership positions in the industry. Students with excellent scholastic abilities and a strong track record of co-curricular activities are encouraged to apply. The scholarship covers full tuition fees for the entire duration of the programme, as well as annual allowance, hostel fees, and return airfare. More information on the scholarship is available at [www.ida.gov.sg/nis](http://www.ida.gov.sg/nis).
About NTU

NTU is a research-intensive university with globally acknowledged strengths in science and engineering. The College of Engineering, which houses the School of Computer Engineering, focuses on technology and innovation. Its research output ranks among the top four in the world.

Eligibility & Application

To enroll in this integrated programme, applicants should:
- Exceed the minimum admission criteria found at www.ntu.edu.sg/admissions
- Meet other rigorous admission requirements, such as panel interviews conducted by IDA, NTU and Georgia Tech
- Be a top performer in academic and co-curricular activities
- Possess a strong passion for IT
- Demonstrate leadership qualities

Application for the programme and scholarship commences in March 2007. For further details, refer to these websites:
www.ntu.edu.sg/admissions and www.ida.gov.sg/nis

In the fast-changing and expanding infocomm industry, Singapore is en route to nurture infocomm talent who can lead the nation in this sector.

Are you the one?
