

REFERENCE INFORMATION AND RULES & PROCEDURES DURING ATTACHMENT

The guidelines provided here are drawn up by the Industrial Attachment Steering Committee. They are intended to guide the student to focus his/her attention on important matters and concentrate his/her efforts in the right direction so as to derive the maximum benefit from the attachment. This would also serve as a source of useful reference information to the student as well as rules and procedures to follow during attachment. The student should consult his/her NTU tutor or CAO for advice and assistance if there is any doubt.
