

MANUFACTURING & ENERGY

Making the personal scaleable: from robots to spare parts.

Chiu-Hao (Ted) Chen, 25, Singapore
Cofounder, EverComm Uni-Tech Singapore

Chen cofounded EverComm Singapore, a provider of energy management analytics solution, in 2013. By modeling real-time equipment energy usage and external environmental factors, it develops energy saving settings for large organizations. To date, it has generated over \$3.4 million in energy savings and \$1 million in revenue. It has received accreditation as an innovative energy analytics company from the Infocomm Development Authority and received an award from the 8th World Entrepreneurship Forum in Hangzhou. The Nanyang Technological University grad is currently expanding the company to Taiwan and Malaysia.
