**Antler expands to India, hires Rajiv Srivatsa to head country's ops**

Global early-stage VC Antler has announced its plans to launch in India to enable more entrepreneurs to build startups through its platform, support, and global reach.

The local operation will start in Bangalore and be led by Rajiv Srivatsa, Co-founder of Urban Ladder, who is joining as Partner.

Magnus Grimeland, Founder and CEO of Antler said it plans to invest in up to 40 companies within its first year of operations in India through a dedicated fund.

Antler also has plans to expand to other major cities in the country in the next three to five years.

Headquartered in Singapore, Antler already has a global presence in 11 locations around the world. The firm said that it democratises entrepreneurship and works with exceptional founders regardless of background or geography.

**Singapore's AngelCentral invests in female essential products PSlove**

AngelCentral, a Southeast Asian community of angel investors, has announced that it has invested an undisclosed pre-Series A amount in homegrown consumer brand for female essential products, PSlove.

With the amount raised from this funding round, PSlove will be expanding its product range and add more markets across Southeast Asia.

PSlove did a zoom virtual pitch to over 40 angels and hosted zoom office visits where founders showcased their numbers and products.

**NTU, Facebook collaborate to launch data centre specialist pilot programme**
The Nanyang Technological University (NTU) and Facebook have announced to jointly launch a nine-month pilot programme that will offer new courses aimed at developing local data centre talent, Channel News Asia reported (https://www.channelnewsasia.com/news/singapore/ntu-facebook-pilot-data-centre-certificate-courses-12791206).

The public programme will be started in August and offer four specialist certificates and one graduate certificate, all eligible for funding and mid-career subsidies from SkillsFuture Singapore.

The four specialist certificates are in Design Engineering, Network Engineering, Site Operations, and Facility Operations, while the graduate certificate is in International Construction Management.

After the nine-month pilot, NTU's Centre for Professional and Continuing Education will progressively introduce more courses in subsequent phases.
