

NTU Singapore is ranked among world's Top 12 universities

Nanyang Technological University, Singapore (NTU Singapore) is ranked 12th in the latest QS World University Rankings, up one place from last year.

The University notably improved its performance in citations per faculty and academic reputation, and scored full marks for its international faculty index. Overall, NTU has moved up 29 places since 2013.

Professor Subra Suresh, NTU President said, "NTU's focus on academic and research excellence has contributed to our rise in local and global stature. NTU provides an exceptional environment for learning as well as high-impact research and innovation, as seen from several independent international rankings. Even as we face unprecedented challenges brought about by the COVID-19 pandemic, our faculty and staff have continued to produce globally impactful research and worked hard to improve our students' learning experience whilst keeping everyone safe.

"As part of the NTU 2025 strategic plan, the University will further strengthen interdisciplinary interactions in education, research and innovation, and address some of humanity's grand challenges such as in sustainability, healthcare and the impact of technologies on humanity and society. On the NTU Smart Campus, we are developing and testing advanced technologies and sustainable solutions, working in partnership with industry, government and academic partners. To ensure that our graduates remain adaptable and resilient in an unpredictable and fast-changing world, job readiness and lifelong learning will remain at the core of our education efforts."

The University's achievement in the QS World University Rankings follows recent successes in other international league tables.

NTU climbed up one spot to 5th place in the Times Higher Education Asia University Rankings released last week.

In the Global Ranking of Academic Subjects by Shanghai Ranking last month, NTU has 10 subjects placed among the world's Top 10 for the second year running. NTU's Nanoscience & Nanotechnology led the list, maintaining its No. 1 position for the fifth consecutive year.

In the QS World University Rankings by Subject in March, NTU ranked first for Materials Science. Eight of NTU's subject areas were ranked in the global top 10, and 25 entered the top 50, marking the University's best performance in the QS subject rankings.

The QS rankings compare the performance of the world's top 1,300 universities across 97 countries and locations worldwide. The results also take into account the distribution and performance of 14.7 million academic papers published between 2015 and 2019, and the 96 million citations received by those papers.
