## About NTU PEAK ASEAN

NTU PEAK ASEAN is a **3-week accelerated programme** where local university students in Indonesia work with NTU students as a team to solve real business challenges or develop innovative ideas for participating organisations. It offers authentic learning in a global business environment and promotes cross cultural exchanges.

## How does it work?

- You will be assigned into a team of 4-6 students (comprising of mainly NTU students and 1 or 2 local university students).
- Each team will work on a challenge topic offered by our participating organisations.
- The participating organisation will assign an experienced staff as the Mentor to supervise the team of students assigned to him/her.
- The teams will work remotely for the first week. For the second and third week, you will join NTU students upon their arrival in the respective city to work on the challenge topic.
- At the end of 3 weeks, the teams will present their solutions to the host organisations.

## Timeline

### 1ST WEEK

- Work on problem statement with team and Mentor
- Design Training Workshop

### 2ND WEEK

2 weeks to work with NTU students and Mentor in Indonesia

**AT THE END OF 3RD WEEK**  
Final Presentation to participating organisations
