

## Ahead together for a brighter future

We're uniting science, technology and talent to get ahead of disease together.

Are you an undergraduate looking to take on an internship with genuine impact?

We are a global biopharma company led by the belief that getting ahead of disease is one of the greatest, most inspiring challenges there is. Getting ahead means preventing disease as well as treating it and we aim to impact the health of 2.5 billion people around the world in the next 10 years. More GSK vaccines and medicines will reach more people who need it the most.

Take on a GSK internship and work on challenging, serious live projects or assignments. We get the benefit of your new perspectives and fresh thinking. You get to learn from us, develop your skills and gain valuable experience for wherever the future takes you. There's something for you regardless of your discipline of study.

Undergraduates from **all disciplines** are welcome!
