Good afternoon to everyone.

Congratulations to the selected 42 CN Yang Scholars coming into our programme this year, of which 23 are awarded the prestigious Nanyang Scholarship. As of today, we have a total of 154 CN Yang Scholars in four cohorts.

The CN Yang Scholars Programme is a top-notch programme launched in 2006 for outstanding students with a passion for Science and Technology. The
programme shares the same philosophy as the Caltech Core Curriculum and the MIT General Requirements with a core curriculum steeped in mathematics and physics, complemented by chemistry and biology, and supplemented with humanities courses to ensure an all round education. With this background, the student will follow their own interests and engage in various branches of science and engineering.

Each year, up to a maximum of 50 students in science and engineering are invited to join the programme. As a CN Yang Scholar, you will enjoy special privileges including a guaranteed place in the NTU halls of residence for the entire period of your undergraduate studies, research opportunities in the science and engineering schools and participation in events organized by the Institute of Advance Studies including interactions with distinguished visiting scientists and engineers, and priority in overseas attachments.

Congratulations once again, and we look forward to seeing you in the CN Yang Scholars Programme.
