## Real-world Adoption of Selected Research (Practical Impact)

- [DARE project] CLOSET, a state-of-the-art comprehensive COI detection and management system has been deployed in **128 submission cycles in 32 venues** including premium conferences such as SIGMOD, VLDB, and LICS (2020 - present). It is also interfaced with Microsoft’s CMT (<https://cmt3.research.microsoft.com/docs/help/chair/conflicts.html#closet>). CLOSET has influenced changes to longstanding COI policies and management in premium data management venues.
- [TRUSS project] A suite of technology-enabled database education systems (e.g., NEURON, LANTERN, ARENA) has been accessed by more than **2,500** distinct users in more than **100** distinct institutions. Surveys of learners show that they benefit from them in learning relational query processing.
- gRNA and Hyperthesis, XML querying and workflow systems for bioinformatics, were part of the product of *HeliXense Pte Ltd*, Singapore (2002 - 2006).
