efficiency and renewable energy
technologies

For policy makers, municipalities, companies
and households

Environmental mission

- Used to deal with energy from an environmental perspective
- Integrative approach: Social and economic aspect
- Sustainability is an inherent part of security

Non-traditional thinking...

...in terms of energy security

- Decreasing demand
- Increasing the use of local resources
 - Diversified
 - Decentralized

Criteria

- Competitiveness
- Affordability
- Accessibility
- Adequacy

Levels of Energy Security

- Households
- Community
- Country
- Continent
- World

Areas of Co-operation

- Climate
- Energy Efficiency
- Renewable Energy Utilization
- Nuclear
- Transparency (data, documents and procedures)

Ways of and Reasons for Co-operation

- Sharing information
- Exchange of experience
- Joint projects: researches, studies, communication projects, awareness raising...
- Similar phenomenon in different countries
 - Use of energy
 - Policy design
 - Public perception
- Together we are “lauder” – higher chance of success

Networking

Current issues and lively themes

Common interest and goals

Resources are also important

Thank you...

...I'm looking forward to your questions and comments.
