

Professor Christian Kloc, Nanyang Technological University

CHRISTIAN KLOC is a professor in the School of Materials Science and Engineering at Nanyang Technological University in Singapore. He joined NTU Singapore in 2007. Previously, he worked in the Materials Research Department at Bell Labs in Murray Hill, New Jersey, US. A native of Germany, he received his higher education at the Technical University in Gliwice, Poland, where he earned a chemical engineering degree. He then joined The Solid State Physics Institute of the Polish Academy of Science in Zabrze in Poland, where he earned his Ph.D. in physics. He was a postdoctoral fellow at the University of Braunschweig in Germany, where he worked on the single crystal growth of metals by electrocrystallization. Later work at the University of Konstanz, also in Germany, focused on the crystal growth of numerous semiconductors and intermetallic compounds. His current research focuses on the study of structure-property relations in organic and inorganic functional materials. Prof. Kloc has published extensively, more than 180 papers in total, and each one of his papers has been cited more than 30 times on average.
